

**CIRCUITS AND METHODS FOR REDUCING INTERFERENCE  
FROM SWITCHED MODE CIRCUITS**

**ABSTRACT OF THE DISCLOSURE**

5 A system 100 including a radio receiver 101/ 108 and  
switched mode circuitry 114/115 operating at a selected  
switching frequency is disclosed. Circuitry 207-209 sets  
the switching circuitry of the switched mode circuitry  
114/115 as a function of a frequency of a signal being  
received by a radio receiver 101/108.
